Subject: Code Repository Access

Hello,

Thank you for bringing to our attention the security flaws with our previous encryption methods. After our previous meeting, we got in touch with our cipher specialists in France and have employed a new standard technique for secure transmission of sensitive data. Please apply the key that was left in your voicemail to this encoded message for access to our new internal code repository.

Code:
UGl5Y1FHVHt2cXN2dHhzcV9tcnhfcXN5X2thY3NhaXd2ZmR6cn0=

Please do not hesitate to reach out if you have any further issues.
